Robin Samuel (PMP | ITIL | CSM)

Email: s.robin15@outlook.com
Contact: +91 9840163142

Professional Summary

Dynamic and results-driven Service Delivery Manager with 10+ years of experience managing global IT operations, enterprise infrastructure, multi-tower service delivery, and high-performing technical teams. Strong expertise across Backup, Storage, Cloud, VMware, ITSM, and large-scale datacenter environments. Proven track record in customer success, SLA governance, automation, migration programs, and continuous service improvement. Adept at managing complex stakeholders, driving operational excellence, and delivering value-driven outcomes for enterprise customers.

Education

B.Tech in Information Technology, SRM University

Core Competencies

- Service Delivery & Operations Management
- Backup & Storage
- VMware vSphere / vCenter / ESXi | Hyper-V | GCP
- Incident, Change & Problem Management (ITIL)
- Customer Relationship & Stakeholder Management
- Cloud Migration & Infrastructure Modernization
- DevOps Practices (Automation)
- AIOps (Monitoring, Self-healing, Incident Automation)
- Team Leadership | Vendor Governance | SLA Management
- Reporting, Billing, Cost Optimization & Risk Management

Product: VMware, Hyper-V, GCP, Dell PowerEdge server, VMAX, Isilon, Unity, PowerMax, PowerStore, Data Domain, ECS, Hitachi, PureStoarge, HPE, Veeam, Networker, Rubrik, Druva, Commvault, Cisco, FortiGate, Palo alto

Tools: ServiceNow, Remedy, CRM, Jira, Confluence, Nagios, SMARTS, ManageEngine, Odoo, BaaS, OpsRamp, Prometheus and Grafana, BMC Helix

Certifications

- VMware Certified Professional (VCP)
- PMP (Project Management Professional)
- Google Cloud Associate
- Scrum Master Certification
- Information Storage Management
- ITIL Foundation V3 | ITIL Service Operation | ITIL Service Transition
- EMC SRM
- EMC Networker (NMC)
- CCNA

Professional Experience

Service Delivery Manager – BIT Solution (September 2025 – Present)

- Lead end to end delivery for 120+ customers, ensuring SLA compliance and operational excellence.
- Manage L1/L2/L3 teams and service desk operations, ensuring 24×7 support and seamless escalation handling.
- Govern backup operations for 20,000+ servers using Veeam, Networker, Rubrik, Druva, and Commvault.
- Led capacity planning and forecasting for infrastructure environments, ensuring optimal utilization of compute and storage resources.
- Implemented proactive capacity optimization strategies, reducing resource wastage and improving cost efficiency.
- Build and manage VMs across vCenter, Hyper V, and GCP environments.
- Involved in contract preparation, SOW creation, selling a new service, and transitioning the service without any slippage, along with developing the project and migration plan.
- Strengthen client relationships by acting as the central point of contact for all service-related matters.
- Managed the full lifecycle of code upgrade activities across multi-customer, multi-device infrastructures
- Conduct governance meetings, SLA reviews, and ensure compliance with contractual obligations.
- Drive continuous service improvements, process optimization, and operational maturity.
- Align stakeholders and functional groups to identify complex business and challenges faced by the Customer, improving Customer satisfaction, resolving Customer escalations, and overall service performance.

- Worked closely with senior leadership to define the strategic direction of the data center, including capacity planning and resource allocation
- Plan and coordinate the implementation of migration and infrastructure projects, ensuring they are delivered on time and within budget.
- Manage service level assessments, billing and conduct analysis on the trends and patterns through SLA reporting.

Service Delivery Manager, HCLTech (July 2024 – September 2025)

- Delivered VMware based infrastructure operations for 20,000+ VM.
- Managed 25 PB+ of customer data across VMAX, Isilon, Unity, Data Domain & ECS platforms.
- Generated capacity utilization reports and trend analysis, enabling data-driven decision-making for stakeholders
- Led VBlock → VXrail migration planning and modernization initiatives.
- Automated repetitive tasks by collaborating with DevOps, improving operational efficiency.
- Conducted service reviews, SLA assessments, and billing audits.
- Guided leadership on datacenter capacity planning and resource utilization.
- Performed risk analyses to identify appropriate security counter measures.

Service Delivery Lead – Dell Technologies (October 2017 – June 2024)

- Managed Storage, Backup, and Cloud service delivery for 16,000+ CIs**.**
- Ensured prompt communication of outages and minimized service downtime.
- Directed global datacenter operations, cost optimization, and resource planning.
- Mentored engineering teams and implemented automation to enhance efficiency.
- Supported infrastructure scaling and cloud capacity planning in hybrid environments including Google Cloud Platform.
- Expertise in Escalation Handling, research and analysis skills to identify the root cause and effective decision making to implement workarounds and fix the issues
- Providing assistance and technical advice to project and support staff on all issues related to IT infrastructure
- Ensured SLA compliance and efficient incident, change, and problem processes.

  Key Projects: Migrated 10,000 backup clients, deployed new storage and backup devices, and upgraded infrastructure**.**
  Key Achievements: Implemented Automation tools and reduced manual work

Service Delivery Engineer – Dell Technologies (January 2016 – September 2017)

- Conducted regular audits of backup configurations to ensure high-quality service.
- Managed and supported an enterprise storage infrastructure, including multiple EMC arrays and Cisco fiber channel switches.
- Troubleshot backup failures between the centralized backup system and client servers.
- Provided storage provisioning and de-provisioning for SAN systems.
- Installed and configured VMware ESXi servers.
- Managed the virtualized environment, including the creation and configuration of virtual machines.
- Identified and resolved performance and capacity-related incidents, ensuring SLA compliance and minimal downtime.

Achievements

- Reduced alert tickets by 75%, achieving a 99.5% backup success SLA monthly.
- Received 12 Inspire Awards and 5 GEM Awards for outstanding performance.
- Automated multiple L1 manual tasks, recognized as a Dell Champion.
- Spearheaded the FTF 2.0 Program for shifting activities to L1 competency, driving significant improvements across managed service accounts.
