SERVICE DELIVERY & PROGRAM MANAGEMENT SUMMARY

Results-driven IT leader with 15+ years of end-to-end ownership across Service Delivery Management, Project & Program Management, and Product Management delivering transformational outcomes for global enterprise accounts at Capgemini and IBM across CPG, FMCG, and Healthcare verticals. Proven track record of governing 200+ enterprise application portfolios with 99.4% SLA attainment, zero unplanned delivery failures, and zero voluntary attrition across managed teams recognised by C-suite executives at Nortura (Norway) and Henkel (Germany) for sustained delivery excellence and long-term stakeholder trust. Deep expertise in ITIL v3/v4 governance, ServiceNow ITSM, Agile/Scrum delivery, P&L ownership, and AI-assisted automation consistently bridging business strategy with technical execution to deliver on time, within budget, and to the highest standards of client satisfaction.

· Sustained 99.4% SLA attainment across a 200+ enterprise application portfolio at Capgemini (Nortura, Norway) governed end-to-end ITIL v4 incident, problem, change, and release management across a 17-member 24×7 team; achieved zero unplanned major delivery failures over 2 years and received formal recognition from Nortura's CIO for delivery partnership excellence and executive stakeholder trust.
· Reduced MTTR by 34% within 6 months and cut repeat major incident volume by 40% implemented a structured problem management framework with RCA discipline, trend analysis, and automated alerting via ServiceNow ITSM; simultaneously drove AI-assisted monitoring and intelligent anomaly detection that reduced false positive incidents by 35% and freed 20% of Level 1 support bandwidth for value-added work.
· Delivered 10+ concurrent digital transformation, cloud migration, and platform modernisation programs on time and within budget maintained full P&L accountability, drove 12% cost optimisation over 18 months through resource utilisation improvements, process automation, and vendor renegotiations; managed vendor and third-party partner performance reducing delivery delays by 22%.
· Retained as sole delivery owner for Henkel Germany (IBM) across 8 consecutive years achieved 99%+ SLA attainment, zero client escalations to senior leadership, and reduced SLA breach incidents by 52% through ServiceNow ITSM workflow optimisation and proactive incident prioritisation; improved BI platform availability from 97.1% to 99.6% and delivered 40% reduction in manual pipeline intervention through ETL automation.
· Drove 30% reduction in manual operational effort through 4 automation initiatives at Capgemini automated monitoring checks, incident classification, change ticket creation, and SLA reporting workflows; owned product vision and OKR-driven roadmap for a 200+ application ecosystem, launched 3 major capability releases with zero P1 post-launch incidents, and achieved 95%+ sprint velocity consistency across distributed Agile teams.

PROFESSIONAL EXPERIENCE

Senior Manager – Service Delivery / Project Manager / Product Manager 03/2023 – Present
Capgemini Bengaluru

· Owned end-to-end unified service delivery across 200+ enterprise applications on Azure, AWS, and on-premise infrastructure with full SLA/OLA/KPI accountability governed ITIL v4 incident, problem, change, and release management including Change Advisory Board (CAB) governance via ServiceNow ITSM, maintaining RAG account health across all active engagements and sustaining 99.4% SLA attainment with zero unplanned delivery failures over 2 years, earning formal CIO recognition from Nortura for delivery partnership excellence.
· Inherited a reactive support environment with high repeat incident volumes and limited observability designed and implemented an operating model covering structured handoffs, work intake prioritisation, role definitions, and staffing plan alignment across offshore-onsite teams, reducing MTTR by 34% within 6 months, cutting repeat major incidents by 40%, and deploying AI-assisted monitoring that reduced false-positive alerts by 35% while freeing 20% of Level 1 bandwidth.
· Led end-to-end onboarding and adoption management for new service workstreams validated prerequisites, defined escalation paths, aligned KB documentation, and tracked onboarding milestones and outcomes; simultaneously managed 6+ concurrent digital transformation and cloud migration programs across multiple geographies, maintaining RAID logs, risk registers, change control, and executive steering committee reporting with 100% on-time, within-budget delivery.
·Owned P&L accountability against rising operational costs drove 12% cost optimisation over 18 months through staffing plan alignment, resource utilisation improvements, process automation, and vendor renegotiations; managed multi-geography third-party partner performance across offshore and onsite teams, reducing vendor-related delivery delays by 22%.
· Owned product vision, OKR-driven roadmap, and backlog prioritisation for a 200+ application ecosystem executed 4 automation initiatives reducing manual operational effort by 30%, launched 3 major capability releases with zero P1 post-launch incidents, and maintained 95%+ sprint velocity consistency across distributed Agile teams spanning multiple geographies.
· Built and led a 17-member 24×7 service desk with full workforce planning, shift management, capacity utilisation, and performance management accountability achieved 0% voluntary attrition across the entire tenure, recognised by Capgemini leadership as a benchmark for team retention and engagement.

Application Owner / Delivery Lead / Product Owner / Senior Analyst 02/2015 – 03/2023
IBM Pvt Ltd Bengaluru

· Retained as sole point of delivery accountability for Henkel Germany across 8 consecutive years governed end-to-end managed services delivery including 24×7 operational support, SLA/OLA compliance, Change Advisory Board (CAB) governance, ServiceNow ITSM workflow management, and continual service improvement across multi-country stakeholders spanning finance, operations, and sales, achieving 99%+ SLA attainment and zero client escalations to IBM senior leadership throughout the engagement.

· Faced persistent SLA breach risks and high manual support effort across enterprise BI and analytics pipelines designed and executed a centralised data strategy covering ETL pipeline delivery, data quality validation, and centralised data storage governance on MS SQL Server and SSIS; reduced SLA breach incidents by 52%, cut manual pipeline intervention by 40%, and maintained RAG account health with zero breach escalations across 8 years.
· Led end-to-end project lifecycle delivery for 10+ enterprise BI and analytics platform programs across multiple geographies managed cross-functional Agile teams of 7+ engineers using JIRA, owned sprint planning, backlog prioritisation, RAID log maintenance, staffing plan alignment, and release governance aligned to Henkel's critical business calendar, improving sprint predictability from 72% to 94% over 2 years.
· Served as Product Owner for 8+ enterprise BI products on MS SQL Server, SSIS, SSAS, SSRS, and Power BI defined product vision, owned roadmap, authored epics, user stories, and acceptance criteria; tracked product KPIs including platform availability, pipeline reliability, and user adoption, improving platform availability from 97.1% to 99.6% through iterative product hardening and proactive infrastructure monitoring.
·Owned P&L accountability, financial forecasting, and change request governance for a multi-country enterprise account managed delivery dependencies across IBM's matrix organisation, maintained multi-geography stakeholder engagement across Henkel's finance, operations, and sales teams, and mentored 3 junior project managers and 2 team leads through structured onboarding and adoption management, with 2 mentees promoted within 18 months.

Senior Systems Engineer 03/2011 – 02/2015
Infosys Bengaluru
· Delivered enterprise application and BI solutions (SSIS, SSAS, SSRS) across full SDLC for US healthcare clients spanning multiple geographies managed end-to-end requirements gathering, development, defect management, and ITIL-aligned incident and service management across offshore-onsite delivery models, ensuring SLA/OLA adherence and structured escalation governance throughout.
· Supported centralised data storage design and ETL pipeline delivery across healthcare reporting platforms contributed to data strategy definition, data quality validation, and structured handoff processes between offshore and onsite teams, building foundational expertise in service delivery operating models, staffing plan alignment, and cross-functional team collaboration.
· Participated in Change Advisory Board (CAB) processes and release governance maintained change control documentation, tracked RAID logs, coordinated multi-geography delivery dependencies, and supported project managers in milestone tracking, resource allocation, and status reporting across concurrent healthcare application programs.

SKILLS

Service Delivery & Operations Management
SLA/OLA/KPI Adherence, Incident Lifecycle Management, Problem Management, Change Management, Release Management, ITIL v3/v4 Governance, Continual Service Improvement (CSI), 24x7 Operations Management, MTTR Reduction, Root Cause Analysis (RCA), Escalation Management, Service Desk Management, Managed Services Delivery, Operational Excellence, Runbook & SOP Maintenance, ServiceNow ITSM, NOC & Helpdesk Delivery, Alert Triage & Monitoring, Patch & Backup Governance, Unified Service Delivery Ownership

Product Management & Ownership
Product Vision & Roadmap, Product Backlog Prioritisation, User Stories & Acceptance Criteria, OKR Tracking, Product KPI Definition, Go-to-Market Strategy, Product Lifecycle Management, Feature Prioritisation, Product Discovery, Go-Live Readiness, Post-Launch Adoption Monitoring, UAT Sign-Off, PRD Authoring, Platform Product Management, SaaS Product Management, Continuous Discovery, Sprint Reviews & Product Demos

Financial & Resource Management
P&L Ownership & Forecasting, Budget Planning, Revenue Forecasting, Cost Optimisation, Margin Management, Resource Utilisation Tracking, Workforce Planning, Capacity Utilisation, Staffing Plan Alignment, Financial Governance, Change Request Governance, Vendor Renegotiation

Project & Program Management
End-to-End Project Lifecycle Management, Scope Management, RAID Log Maintenance, Risk & Dependency Management, Milestone Tracking, Budget Management, Resource Allocation, Capacity Planning, Change Control, Governance & Cadence Reviews, Sprint Planning & Backlog Management, Agile/Scrum/Waterfall/Hybrid Delivery, Offshore-Onsite Delivery Coordination, Critical Path Management, Status Reporting, Executive Steering Committee Presentations, MS Project, JIRA, Smartsheet

Stakeholder & Client Management
Executive Stakeholder Management, Client Relationship Management, Expectation Alignment, Governance Forum Leadership, Service Review Meetings, Sentiment Tracking, Escalation Governance, Cross-Functional Collaboration, Vendor & Contract Management, Third-Party Relationship Management, Onboarding & Adoption Management, RAG Account Health Tracking, Churn Prevention, Upsell & Cross-Sell Identification, Account Management

Technology, Analytics & Automation
ServiceNow, Power BI, MS SQL Server, SSIS (ETL/ELT), SSAS, SSRS, Databricks (DBX), Azure, AWS, Google Cloud (GCP), Microsoft Fabric, Microsoft Power Platform, JIRA, Confluence, Salesforce (CRM), SharePoint, Intelligent Alerting & Anomaly Detection, AI-Assisted Monitoring & Observability, Process Automation & Optimisation, Dashboard & KPI Reporting, Data Modelling, ETL Pipeline Delivery, RMM Tooling

PROJECTS

Proactive Problem Management & Repeat Incident Elimination Framework 06/2023 – 09/2023
Azure, AWS, ServiceNow ITSM, Power BI, AI/ML Monitoring Tools
· Identified recurring major incident patterns across the 200+ application estate as a critical delivery risk designed and implemented a structured problem management framework with trend analysis, permanent fix tracking, Change Advisory Board (CAB) governance, and automated alerting enhancements, eliminating root-cause recurrence and reducing repeat major incident volume by 40%.

· Built and maintained centralised SLA/KPI/OLA dashboards in Power BI presented monthly service governance reports covering incident trends, MTTR performance, RAG account health, and CSI plans to Nortura's C-suite and Capgemini senior leadership, earning formal CIO recognition for delivery transparency and executive stakeholder trust.

Enterprise Application Portfolio Modernisation & AI-Assisted Observability 05/2023 – Present

Azure, AWS, ServiceNow ITSM, Power BI, AI/ML Monitoring Tools

· Owned end-to-end product vision, roadmap, and delivery of an enterprise-wide observability and monitoring modernisation initiative across 200+ applications identified low observability and high manual intervention as core pain points through product discovery with business and operations stakeholders, translated findings into a prioritised product backlog, and executed delivery across distributed offshore-onsite Agile teams spanning multiple geographies.

· Designed and implemented an operating model covering structured handoffs, work intake prioritisation, role definitions, and staffing plan alignment deployed AI-assisted intelligent alerting and anomaly detection via ServiceNow ITSM, reducing false-positive incidents by 35%, freeing 20% of Level 1 bandwidth, and cutting MTTR by 34% within 6 months of go-live.

· Governed full go-live readiness, post-launch adoption monitoring, and RAG account health tracking achieved zero P1 post-launch incidents across 3 major capability releases and sustained 99.4% SLA attainment across the entire managed application portfolio.

Cloud Migration & Digital Transformation Program 06/2023 – Present

Azure, AWS, JIRA, MS Project, Agile/Scrum

· Led end-to-end project lifecycle management for 6+ concurrent large-scale IT programs covering cloud migration, application modernisation, infrastructure integration, and digital transformation developed comprehensive project plans covering scope definition, WBS, milestone tracking, RAID logs, risk registers, change control, and staffing plan alignment across multi-geography offshore-onsite Agile teams.

· Owned P&L accountability, budget governance, and vendor management across the program portfolio drove 12% cost optimisation over 18 months through resource utilisation improvements, process automation, and vendor renegotiations; managed third-party partner performance across multiple geographies, reducing vendor-related delivery delays by 22% and delivering 100% of programs on time and within budget.

Automation & Operational Efficiency Initiative 05/2025 – Present

ServiceNow ITSM, Power BI, Process Automation Tools

· Identified manual operational effort across monitoring, incident classification, change ticket creation, and SLA reporting as key inefficiencies impacting team capacity and delivery quality designed and executed 4 automation initiatives reducing manual operational effort by 30%, enabling the 17-member 24×7 team to redirect bandwidth toward value-added service improvement and onboarding activities.

· Drove onboarding and adoption management for new automated service workstreams validated prerequisites, aligned KB documentation, defined escalation paths, and tracked onboarding milestones and outcomes; maintained 95%+ sprint velocity consistency and 0% voluntary attrition across the team throughout the initiative.

Enterprise BI Platform Centralisation & Data Strategy 05/2015 – 01/2023

MS SQL Server, SSIS, SSAS, SSRS, Power BI, ServiceNow ITSM

· Identified fragmented BI reporting, inconsistent data quality, and high manual pipeline intervention as core platform risks across Henkel's multi-country operations designed and executed a centralised data strategy and data storage operating model covering ETL pipeline delivery, data quality validation, automated report distribution, and structured handoff processes across multi-geography offshore-onsite teams.

· Served as Product Owner for 8+ enterprise BI products owned product roadmap, backlog prioritisation, epics, user stories, acceptance criteria, and OKR-driven product KPI tracking; delivered 3 automation initiatives reducing manual pipeline intervention by 40%, improved platform availability from 97.1% to 99.6%, and managed 5+ major product go-lives with zero P1 incidents in the first 30 days post-launch.

BI Platform SLA Governance & Service Optimisation 05/2015 – 01/2023

ServiceNow ITSM, MS SQL Server, Power BI, SSRS

· Governed 24×7 managed services delivery for Henkel's enterprise analytics platforms across multi-country, multi-geography operations implemented ServiceNow ITSM workflow optimisation, proactive SLA monitoring, Change Advisory Board (CAB) governance, and structured incident prioritisation, reducing SLA breach incidents by 52% and maintaining RAG account health with zero breach escalations across 8 years.

· Produced and presented monthly and quarterly service delivery reports covering SLA attainment, incident trends, MTTR performance, RAG status, and continual service improvement plans maintained full stakeholder alignment across Henkel's finance, operations, and sales leadership across 5 countries, sustaining zero client escalations to IBM senior leadership throughout the 8-year engagement.

Agile Delivery Maturity & Team Development Program 05/2018 – 06/2022

JIRA, Confluence, Agile/Scrum, MS Excel

· Identified low sprint predictability (72%) and inconsistent delivery governance as key risks to program outcomes across the Henkel engagement introduced structured backlog governance, acceptance criteria standards, RAID log discipline, staffing plan alignment, and sprint review cadence across distributed Agile teams, improving sprint predictability from 72% to 94% over 2 years.

· Led structured onboarding and adoption management for 3 junior project managers and 2 team leads defined onboarding milestones, delivery maturity frameworks, and performance management checkpoints; built capability in risk management, stakeholder communication, and Agile delivery discipline, with 2 mentees promoted within 18 months
