SUMMARY

- Quality Engineering Analyst with 5+ years of experience in test automation using Selenium WebDriver and Java.
- Strong expertise in REST API automation using Rest Assured, along with TestNG and CI/CD integration using GitHub Actions for automated test execution.
- Experienced in building scalable automation frameworks, working in Agile environments, and validating end-to-end workflows across web and API layers.

SKILLS

Testing Tools: Selenium WebDriver, Selenium Grid, Rest Assured, Postman, TestRail
Frameworks: TestNG, Cucumber (BDD), JUnit, Data-Driven Framework
Programming & Technologies: Core Java, JSON, API Automation (Rest Assured)
DevOps & Version Control: Git, GitHub, GitHub Actions, Maven, Azure DevOps
Platforms & Databases: Presto (SQL Query Engine - Data Validation & Testing), IBM iSeries (AS400), Mainframe
Testing Types: Functional Testing, Regression Testing, API Testing, Web Testing, Mobile Testing

EXPERIENCE

Quality Engineering Analyst 2025 - Present
Infosys (Client: Northern Trust) | Chennai

- Expertise in creating scripts in Selenium WebDriver using Java for automating web-based applications.
- Experienced in BDD framework using Cucumber.
- Experienced in version control using GIT.
- Expertise in handling TestNG, Data Driven and JUnit framework.
- Expertise in working with Agile-Scrum methodology.
- Implemented Selenium Grid for parallel test execution across multiple browsers to reduce execution time.
- Experience in Functional, Regression and System testing using automated testing tool - Selenium WebDriver.
- Experience in REST API testing and automation using Rest Assured for validating backend services.
- Validated API responses including status codes, headers, and payload data.
- Worked on application migration from IBM iSeries (AS400) to modern React-based web application with Java backend.

Test Analyst 2021 - 2025
Amazon Development Centre | Chennai

- Developed and maintained automated test scripts using Selenium WebDriver with Java for web-based applications.
- Implemented BDD framework using Cucumber for test automation.
- Executed functional, regression, and system testing for e-commerce web applications.
- Designed and executed test cases for critical user workflows such as product search, cart, and checkout.
- Performed cross-browser testing to ensure application compatibility.
- Collaborated with developers and business teams to understand requirements and ensure test coverage.
- Used TestNG framework for test execution and reporting.
- Involved in defect tracking and management using JIRA.
- Hands-on experience in TestRail for test case management and execution.

EDUCATION

B.Tech in Electronics and Communication 2014 - 2018
MG University
