Pune, INDIA

Enthusiastic Java Developer with around 1 year of hands-on experience in Java, Spring Boot, and REST APIs. Skilled in building backend applications, database management using MySQL, and frontend basics with React.js, HTML, CSS, and JavaScript. Good understanding of OOP concepts, collections, exception handling, and MVC architecture. Passionate about learning new technologies and contributing to scalable web applications. Looking for an opportunity to work as a Java Full-Stack/Backend Developer in a growth-oriented organization.

Spring Boot Framework | Microservices | Docker | Postman | Python | React.js | Javascript | CSS | HTML | Github | GIT | SQL | Rest APIs | Spring Boot | Java | Springboot Java

WORK EXPERIENCE

Java Full Stack Developer-CGPI Software Private Limited **Jun 2024 - Present**

Worked on Java and Spring Boot based web applications. Experience in developing RESTful APIs, CRUD operations, and authentication using JWT. Familiar with Hibernate/JPA, MySQL database design, and version control using Git. Basic knowledge of React.js for frontend integration. Strong problem-solving skills, debugging, and understanding of software development lifecycle (SDLC). Able to work in team environments and deliver clean, maintainable code.

PROJECTS

Internship and training platform **59 Days**

This Project is based on using language html,css,js and react

Employee Management System **61 Days**

The Employee Management System is a software application developed using Java to manage employee information efficiently within an organization. The system allows users to add, update, delete, and view employee records such as employee ID, name, department, salary, and contact details. It helps reduce manual work and improves data management by storing employee information in a structured manner. The application ensures easy access to employee data and provides a simple interface for managing employee-related operations.

Tours And Travels Website **61 Days**

The Tours and Travels Website is a web application designed to help users explore and book travel packages online. The frontend is built using HTML, CSS, JavaScript, and React, providing a responsive and user-friendly interface. The website displays various travel destinations, tour packages, pricing, and booking details. Users can browse destinations, view package information, and submit booki
ng inquiries. React is used to create reusable components and manage dynamic content, while CSS ensures an attractive layout and responsive design across devices.
