CAREER OBJECTIVE

Motivated technology enthusiast with hands-on experience in developing applications and a strong interest in software development and problem solving. Seeking opportunities to contribute to real-world projects, enhance technical skills, and grow professionally across diverse roles in software development, project coordination, and operations.

EDUCATION

Vishwakarma University, Pune **2024 – 2026**
Master of Computer Applications (MCA) ***CGPA: 8.97/10*** *Pune, MH*

Savitribai Phule Pune University, Pune **2021 – 2024**
Bachelor of Computer Applications (BCA) ***CGPA: 9.01/10*** *Pune, MH*

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, SQL
Backend: Spring Boot, Spring MVC, Hibernate, REST APIs, Spring Cloud (Eureka, API Gateway, Config Server)
Databases: MySQL, PostgreSQL, MongoDB
Messaging: Apache Kafka
Developer Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Linux
Key Concepts: Object-Oriented Programming, REST API Design, Microservices Architecture, Event-Driven Systems, Database Design, Data Structures & Algorithms
Soft Skills: Team Collaboration, Communication Skills, Adaptability, Quick Learning, Time Management, Analytical Thinking
Productivity Tools: MS Excel, MS PowerPoint, Google Workspace (Docs, Sheets, Slides), Jira, Power BI, Tableau

PROJECTS

Fitness AI – Microservices Platform | Java, Spring Boot, Apache Kafka, PostgreSQL, MongoDB, Keycloak

- Developed a full-stack microservices-based fitness application using Spring Boot, implementing service discovery, API Gateway, and centralized configuration.
- Designed an event-driven architecture using Apache Kafka to enable asynchronous communication between services for scalable activity processing.
- Integrated AI-powered fitness insights using Gemini API and secured APIs using Keycloak with OAuth2 and PKCE authentication.
- Implemented polyglot persistence using PostgreSQL for structured user data and MongoDB for flexible activity tracking.

WeatherX – Weather Forecast Application | Java, Spring Boot, REST APIs, HTML, CSS, JavaScript

- Developed a weather forecasting application that fetches real-time weather data and 7-day forecasts using a Spring Boot backend API.
- Designed RESTful APIs to handle city-based weather queries and deliver structured forecast data to the frontend.
- Built a responsive user interface using HTML, CSS, and JavaScript to display temperature, weather conditions, and forecasts.
- Integrated external weather API to retrieve real-time data and dynamically update the UI.

BookMyTrain – Railway Booking Console Application | Java, OOP, Collections Framework

- Developed a console-based railway booking system simulating core IRCTC functionalities such as user registration, login, ticket booking, and cancellations.
- Implemented train search, seat availability checks, and ticket management using Java Collections for efficient data handling.
- Applied object-oriented programming principles including encapsulation, inheritance, and polymorphism to design modular and maintainable code.

ACHIVEMENTS

- Secured **2nd Rank** across all 3 years of BCA; maintained **8.5+ SGPA** in MCA 1st year, ranking among the top 10% of the batch.
- Developed multiple real-world projects and actively maintained code on GitHub.

CERTIFICATIONS

• Linux • Java Development • Cloud Computing
