github.com/naveensp7359

SUMMARY

Motivated AI/ML student with a strong foundation in Python, Machine Learning basics, and data analysis. Experienced in developing simple AI-based applications and database-driven systems using Python and SQL. Familiar with tools such as NumPy, Pandas, and MySQL for data processing and analysis. Possess basic knowledge of cybersecurity and networking concepts. Passionate about learning new technologies and building practical software solutions.

EDUCATION

Bangalore Institute of Technology, Bengaluru 2022 – 2026
Bachelor of Engineering in Artificial Intelligence and Machine Learning
Gurukula Independent PU College, Kalaburagi 2022
Pre-University Course (PCMB) – 94%
Bharateeya Vidya Kendra, Siranoor 2020
State Board – 93.6%

PROJECTS

AI-Powered Terminal Assistant 2024 – 2025
Python, Local LLMs, Whisper

- Developed an offline AI assistant that converts natural-language queries into terminal commands.
- Implemented a risk-classification module that warns users about harmful operations.
- Designed modular NLP pipeline for intent detection and command mapping.
- Achieved 87% command-generation accuracy and 92% risk-detection accuracy.

Railway Management System 2023 – 2024
Python, Database Systems

- Built a railway management system supporting bookings, cancellations, and schedules.
- Designed a normalized MySQL schema with indexing and transaction-safe operations.
- Implemented authentication and automated ticket generation.
- Optimized SQL queries for real-time seat availability.

TECHNICAL SKILLS

Programming: Python, SQL, C
Cyber Security: Basic cyber attacks, networking fundamentals
Data Science: NumPy, Pandas, Matplotlib, SciPy
Databases: MySQL, MongoDB
Core Concepts: Data Structures, Algorithms, OOP, Operating Systems
