OBJECTIVE

MCA student with a strong foundation in software development and problem-solving. Seeking to contribute to innovative projects while learning and growing professionally in a dynamic environment.

SKILLS SUMMARY

- **Languages:** C, C++, Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Flask And FastAPI
- **Other:** Problem Solving, Data Structures, Data Analysis, Artificial Intelligence, LLM/RAG And Machine Learning
- **Tools:** VS Code, Postman, Jupyter, IDLE, MongoDB Compass, pgAdmin4 And AI Tools

EDUCATION

Medicaps University

Master of Computer Applications (MCA); CGPA: 8.28

Deshbandhu College, Delhi University

BSc (Physical Science with Computer Science); CGPA: 7.49

Govt Model H S School Mahidpur

12th: 89.2% | 10th: 89.2%

EXPERIENCE

Zaalima Development Remote

Full Stack Web Development Intern *April 2025 – Sep 2025*

- Contributed to design, development, and deployment of dynamic Application using MERN stack (MongoDB, Express.js, React.js, Node.js) And AI-ML.
- Built responsive UI components in React.js with Tailwind CSS; integrated RESTful APIs for CRUD operations and real-time data handling.
- Implemented JWT-based authentication, used Git/GitHub for version control, and improved code quality through code reviews.

PROJECTS

EV Knowledge Bot: AI-powered chatbot for electric vehicle guidance using LLM/RAG architecture with a Flask backend and React frontend.

Key Features: Natural language Q&A on EV types, charging, maintenance & benefits; context-aware responses via RAG pipeline; SQLite for efficient data retrieval; REST API integration between frontend and backend.

Tech: *Flask, React.js, Python, LLM/RAG, SQLite, REST API* **Link:** github.com/Nagorisaifali/Electric-vehicle-knowledge-bot-

Food Delivery System: Full-featured responsive food delivery web app with React.js frontend and Redux for centralized state management.

Key Features: Browse restaurants & menus, add/remove cart items, place orders; reusable components with dynamic routing; real-time cart state sync; deployed live on Netlify.

Tech: *React.js, Redux, JavaScript, HTML5, CSS3, React Router* **Link:** resplendent-cajeta-f2e0db.netlify.app

Blog Application: MERN stack blog platform enabling users to write, publish, and manage posts with a full admin dashboard.

Key Features: Secure JWT-based user authentication & authorization; rich text post editor; admin panel for content moderation; dynamic routing and responsive UI; RESTful API with MongoDB Atlas.

Tech: *MongoDB, Express.js, React.js, Node.js, JWT, REST API* **Link:** github.com/Nagorisaifali/BlogApplication

ACHIEVEMENTS

- Certified in Data Structures and Algorithms using C++.
- Secured Second Position in Code-a-thon.
