WORK EXPERIENCE

Frontend Developer | Self-Learning & Project Practice 2023 – Present

- Built 4 web apps using React.js, JavaScript, Java, and MySQL adhering to industry code standards.
- Practised JWT auth, Redux Toolkit, REST API integration, and cross-device responsive design throughout.
- Maintained structured Git branching with CI/CD pipelines via Vercel and Netlify.

PROJECTS

Hotel Booking Admin Dashboard | React.js · Redux Toolkit · REST APIs · CSS3 | Apr – Jun 2026

- Admin panel to manage reservations, guest profiles, room availability, and booking status with Redux Toolkit for centralised state.
- REST APIs handle CRUD operations, real-time search, filtering, and pagination across all booking records.
- All routes protected with JWT; role-based access restricts admin-only operations.

Expense Tracker Web App | React.js · Context API · Local Storage · CSS3 | Feb – Mar 2026

- Income and expense tracking with live balance updates and persistent storage via Context API and local storage.
- Mobile-first UI with consistent layout across desktop, tablet, and mobile viewports.
- Live Demo | GitHub

Developer Portfolio | React.js · React Router · JavaScript · CSS3 | Jan – Feb 2026

- Modular component architecture with React Router DOM for smooth client-side navigation between sections.
- Fully adaptive layout showcasing projects, skills, and contact details across all screen sizes.
- Live Demo | GitHub

Online Voting System | Java · MySQL · HTML · CSS · JavaScript | Jan – Mar 2025

- Secure voting platform with user authentication, ballot workflow, and JDBC-backed MySQL storage using Java OOP.
- Client-side form validation with HTML, CSS, and JavaScript ensures accurate and tamper-resistant submissions.
