EXPERIENCE

Amber Jan 2026 – June 2026
SDE Intern

- Contributed to production-level full stack features on a student housing platform serving 1M+ monthly users across 250+ cities near 800+ universities.
- Implemented "Nearest University" tag with accurate distance-from-property calculation across 800+ universities, resolving a critical logic issue during development that significantly improved location accuracy for students.
- Led revamp of high-traffic user-facing pages (Property Page, City/Country Pages) in close collaboration with designers, QA, and product managers, driving end-to-end delivery from development through deployment validation.
- Developed a dedicated Video Page showcasing property-specific videos and reviews across 16,000+ properties, enabling agents to seamlessly share curated property tours with prospective students.

PROJECTS

NavNews | *React.js, Node.js, MongoDB, Socket.io, Google Maps API, BeautifulSoup, Google Gemini API*

- Developed ride-booking platform integrating event schedules with real-time location data, enabling users to discover venues and navigate to the top 20 pickup spots.
- Enabled real-time communication between riders and passengers using Socket.io and integrated Google Maps API for location-aware routing, resulting in smoother coordination and faster ride matching.

HackMate | *React.js, Node.js, MongoDB, Socket.io, Selenium, Google Gemini API*

- Engineered a platform for students to discover hackathons and connect with teammates, facilitating team formation posts and responses.
- Enabled real-time messaging for seamless collaboration, improving pre-event communication and planning.
- Streamlined hackathon participation by centralizing event listings and networking opportunities on a single platform.
