PROFILE SUMMARY

QA Engineer with over 3 years of experience in both manual and automation testing. Adept at accelerating test cycles and improving execution efficiency through parallel testing strategies. Strong analytical problem-solver seeking a challenging QA role to implement industry best practices and adopt emerging automation technologies.

WORK EXPERIENCE

Dec 2022 – Present

Capgemini - Chennai, India
Quality Assurance Engineer

- Expertise in **Software Testing Life Cycle (STLC)**, including risk analysis, test case design, defect life cycle management, and test summary reports.
- Expertise in **functional, smoke, sanity, regression, integration, exploratory** and **non-functional testing** within **Agile/Scrum** environments.
- Ensured telecom software quality through comprehensive performance, manual API and automation testing.
- Contributed to multiple OSS/BSS engagements, managing QA activities **during legacy system replacements, software upgrades** and **cross-platform integrations**.
- Manually executed telecom MACD (Move, Add, Change, Disconnect) operations across various speed plans and validated provisioning workflows from order intake to completion.
- Conducted **API testing** by:
  - Testing **30+ REST, event-driven,** and **batch APIs**' functionality using Postman.
  - Leveraging a Behavior-Driven Development (BDD) automation framework utilizing REST Assured, Java, Cucumber, Maven, and Jenkins.
  - Validating endpoints against Swagger specifications, schemas, and contract requirements.
  - Ensuring data integrity through SQL database and Splunk logs.
- Executed additional API scenarios:
  - Managing data dependencies using **API chaining**.
  - Orchestrating **job scheduling** via Control-M APIs.
  - Verifying **message queues** inside the Artemis web console.
- Conducted **performance testing** by:
  - Tracking performance variations through **baseline load tests**.
  - Mapping test plans against **non-functional requirements (NFRs)**.

- Documented clear project scope, schedules, and comparison methodologies.
- Collaborated closely with **cross-functional teams** to address blockers, ensuring **on-time delivery**.
- Expanded technical skill set into automation testing using Playwright with Javascript.

EDUCATION

2018 – 2022 **BE - Computer Science Engineering**, Paavai Engineering College - Namakkal, Tamil Nadu
8.41 CGPA

2018 **HSC**, Malar Matriculation School - Namakkal, Tamil Nadu
93.08 %

2016 **SSLC**, The SCSM Matric Higher Secondary School - Namakkal, Tamil Nadu
97.2 %

SKILLS & ABILITIES

Testing Tools:	Postman, SoapUI, JMeter
Automation Testing:	REST Assured, Playwright, Cucumber BDD
Programming:	Java, Python, Javascript
Log Monitoring:	Splunk
Database:	SQL
Build & CI/CD:	Maven, Jenkins
Project Management:	JIRA, Confluence
AI Skills:	Prompt Engineering, Claude, MCP
